

The High Quality Scan

Ultra High resolution
High color Reproducibility
High speed

PIGMA LION SCANNER

chnologies to the extent
scanning adjustments.

→ High color Reproducibility

The color Reproducibility is
color precision is less than
distribution of the light
affects the quality
developed with

→ High speed

First of
scan
Including setting time, it is faster than
image processing time is shorter by less distortion because adjustment
(based on high color reproducibility) time is very short by LED light
source.
